MESSAGE FROM THE ORGANIZING COMMITTEE

Welcome to the Brazilian Breast Cancer Symposium 2023.

After two years away due to the pandemic, the Brazilian Breast Cancer Symposium returns to Pirenópolis. We are happy to welcome you to this beautiful and charming city, listed as a national heritage in the center of Brazil, providing the guest with contact with a place that preserves its ancient, bucolic appearance and an environment of extreme natural beauty.

For the twelve edition we prepared something new. For the very first time we will have a hybrid symposium. Participants may attend at Pirenópolis or follow it online. As in previous years, the scientific program was carefully thought out and the speakers were chosen based on scientific merit in publications or didactics.

It's been 12 years of brand consolidation, in which researchers and professionals who deal with breast cancer have come together to discuss and present what's new and current in the fight against the disease. Today, it is considered the largest breast cancer research event in Latin America.

We hope that every participant feels welcome and can really realize it was worth coming to spend these days with us in Pirenópolis.

Welcome to the largest breast cancer research event in Latin America, make the most of every moment, every idea, every friendship and all the learning you can acquire during this time.
